

BALRAJ V

Security Analyst

☎ +916385521126 | ✉ harafamgp@gmail.com | ∞ <http://www.linkedin.com/in/balraj-v-ha>

SUMMARY

Dedicated SOC Analyst (Tier 1) with 2+ years of experience in security monitoring, alert triage, and incident investigation. Skilled in using CrowdStrike, Sumo Logic, Mimecast, Netskope, and Censys ASM for threat detection and validation. Strong foundation in log analysis, threat identification, malware containment, and vulnerability management. Improved MTTR by 15% through efficient triage and clear escalation. Experienced with the MITRE ATT&CK framework and recognized for analytical thinking, fast learning, and strengthening overall security posture.

PROFESSIONAL EXPERIENCE

Junior Security Intern | Dec 2022 – May 2023 | Prompt Info Tech

- Conducted **digital forensic analysis** using Autopsy and FTK to extract artifacts, analyze evidence, and support investigation workflows.
- Performed manual **web application penetration testing** with Burp Suite, identifying and validating OWASP Top 10 vulnerabilities.
- Participated in **bug bounty programs**, submitting verified security findings and contributing to vulnerability discovery.
- Supported **network configuration tasks** and assisted with implementing basic system hardening measure

SOC Analyst L1 Intern | July 2023 – Dec 2023 | Nakoa Technologies

- Implemented **Wazuh endpoint monitoring** and performed detailed log analysis to identify security events and support SOC workflows.
- Conducted **IP blocking**, threat mitigation, and response actions to contain suspicious or malicious activity.
- Installed and configured the **Wazuh SIEM platform**, ensuring proper integration with security workflows.
- Deployed and managed **Wazuh client agents** across endpoints.
- Created custom **Wazuh rules and queries** to improve alert accuracy, detection coverage, and overall endpoint security posture.

SOC Analyst L1 | Dec 2023 - Present | Nakoa Technologies

- Monitored and investigated security events in **Sumo Logic** and **CrowdStrike**, performing alert triage, endpoint analysis, and compromised host containment.
- Managed email security in **Mimecast** by analyzing suspicious messages and blocking phishing domains through targeted policy creation.
- Identified external exposures and anomalies using **Censys ASM** to strengthen attack surface visibility.

- Validated **IDS/IPS alerts**, supported incident response, and applied the **MITRE ATT&CK** framework to enhance detection quality.
- Performed threat intelligence analysis with **Seclytics** to assess IP reputation and support proactive threat hunting.
- Helped reduce **MTTR by 15%** through efficient triage, escalation, and coordination with Tier 2/3 teams.
- Created and maintained **CrowdStrike prevention policies** to improve endpoint protection and reduce false positives.
- Assisted in developing security and DLP-related policies to improve data protection across endpoints.
- Participated in **GRC vendor security reviews**, ensuring alignment with organizational security standards..

Achievements

- Received Star of the Month Award for identifying missing ticket creation for Netskope security events, preventing gaps in alert handling and improving incident visibility and workflow accuracy.

EDUCATION

- **2019 - 2022 | CMS College of Science & Commerce**
Bachelor of Computer Application | 70%

CERTIFICATION

Security: CEH, CHFI, Netskope Security Cloud, Censys ASM, Tines Automation

Networking: A+, N+, CCNA, MCSE

Systems & Tools: Linux Fundamentals

Query Language: Sumo Logic LSQL

TECHNICAL SKILLS

Penetration Testing:	Web Application, Network
Network & Security Tools:	Nmap, Wireshark, Zenmap, Ettercap, Metasploit, Burp Suite
SIEM & EDR:	Wazuh, Sumo Logic, CrowdStrike
Operating Systems:	Linux, Windows
Languages & Databases:	Python, MySQL
Networking Protocols:	RIP, OSPF, BGP, EIGRP
Tools & Simulators:	Packet Tracer, TShark, Hamster
